

CHIA CARLYLE

FULL-STACK SOFTWARE DEVELOPER

[Email](#) | [Github](#) | [LinkedIn](#) | [Twitter](#) | [AngelList](#) | [Medium](#) | [Portfolio](#)

SUMMARY

Full-stack software engineer with 4+ years of experience building and maintaining modern web applications across frontend and backend systems. Strong in TypeScript, Next.js, Node.js, NestJS, PostgreSQL, and product-focused engineering, with hands-on experience shipping production features, debugging complex issues, reviewing code, and improving system reliability. Comfortable working in AI-assisted development workflows, using AI tools to accelerate delivery while applying strong judgment around architecture, security, performance, and maintainability.

SKILLS

Core Stack: TypeScript, JavaScript, Next.js, React, Node.js, NestJS, PostgreSQL

Backend & APIs: Express.js, Prisma, GraphQL, REST APIs, MySQL, MongoDB

Infrastructure & Delivery: Git, GitHub, Docker, CI/CD, Cloudflare, Cloudflare Workers, GCP, Vercel, Netlify, Heroku

Testing & Quality: Jest, RSpec, Chrome DevTools, Code Review, Debugging, Performance Optimization

Working Style: Remote Collaboration, Technical Communication, Mentoring, Agile, TDD, AI-assisted Development

EXPERIENCE

BLUEWINDOW LTD Douala, Cameroon

Full-stack Developer

On-site

March 2024 – March 2026

- Build and maintain full-stack web platforms using modern JavaScript/TypeScript workflows, improving application performance, reliability, and user experience across affiliate and media products.
- Debug production issues, refine feature implementations, and improve maintainability through structured code review, testing, and iterative improvements.
- Integrate third-party APIs, content systems, and analytics pipelines to support real-time product experiences and business-critical reporting.
- Collaborate with product, SEO, and design stakeholders to deliver scalable features aligned with growth, usability, and platform stability goals.
- Contribute to deployment and release workflows using GitHub-based collaboration, modern hosting platforms, and environment-aware delivery practices.

REBASE SOLUTIONS Yaoundé, Cameroon

Software Developer

On-site

January 2023 – February 2024

- Building and maintaining several real-world applications and software with pixel-perfect attention to detail.
- Extensive code and article reviews.
- Providing assistance, tutorship, and mentorship to young developers.

FEATURED PROJECTS

Full-stack Web Developer

Remote

2022 – Present

Job Seeker Os - Built a full-stack job seeker productivity platform that aggregates public job listings, enables users to save, track, and manage applications, and delivers personalized workflows through an authenticated dashboard; implemented using Next.js (App Router), React 19, TypeScript, Prisma, PostgreSQL, and NextAuth, with resilient cross-session persistence (cookies + localStorage) to ensure seamless job saving across login/signup flows.

- Built with: Next.js (App Router), React 19, TypeScript, Prisma, PostgreSQL, and NextAuth.
- [Live demo](#)
- [Source code](#)

Mentora (Mentor@) - AI-powered mindset coaching and career orientation platform designed to guide students and

early-career professionals with coaching flows, career resources, and scalable content architecture.

Product / Live Project

- Built with: (Next.js, TypeScript, Tailwind CSS, Sanity CMS, NextAuth, Cloudflare, Cloudflare Workers, Vercel).
- [Source code](#)

Hotel Reservations - A reservation platform where users can browse and book hotels, while admins manage listings, inventory, and property details through an integrated admin workflow.

[Source Code](#)

- Built with: (Ruby on Rails, React, Redux, JavaScript, CSS3, HTML5).

MICROVERSE

Mentor (Volunteer)

Remote

January 2022 – January 2023

- Mentor junior developers through code reviews and hands-on technical support.
- Recommend improvements to code organization, readability, and performance.
- Support learner motivation, consistency, and long-term growth in remote training environments.

EDUCATION

MICROVERSE

January 2022 – December 2022

Remote Full-stack Web Development Program, Full Time.

- 1300 hours and counting, mastering algorithms, data structures, and full-stack development while simultaneously developing projects with JavaScript, React, and Redux.
- Developing skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

UNIVERSITY OF BAMENDA

September 2018 – June 2021

Bachelor of Science Degree, Microbiology.

- Minor in Medical Laboratory Technology.
